Self-motivated and well-disciplined when it comes to work.

SOFTWARE DEVELOPER

JAVA | ANGULAR | ANALYTICAL

- Current student of Software Engineering Technology (Fast-Track) Advanced Diploma.
- 1.8+ years of experience in designing and developing various software applications and enterprise information system.
- Proficient in Java, J2EE, Oracle Database Management, HTML, CSS, JavaScript and Angular.
- Skilled with version control tools including Git, GitHub, and Bitbucket.

TECHNICAL SKILLS

Programming Languages:	Java, C#, JavaScript, Kotlin, SQL, PL/SQL, NoSQL
Databases:	Oracle Database, MongoDB
Backend Frameworks:	Spring, Hibernate, Node.js, Express.js
Frontend Frameworks:	Angular, React
Development Tools:	Git, GitHub, Eclipse, IntelliJ, Visual Studio Code, Visual Studio
Testing & Automation:	Selenium, Postman, Apache JMeter

WORK EXPERIENCE

Software Associate   Sept 2022 – Mar 2024

AIVHUB PVT LTD, India

- Developed applications/modules based on client requirements using Java, JavaScript, and SQL/PLSQL.
- Integrated the Angular front-end framework with back-end services built using Spring to deliver responsive and scalable applications.
- Implemented RESTful APIs using microservice architecture to ensure seamless client-server communication, enhancing application functionality.
- Demonstrated strong collaboration skills, effectively working with marketing team, Developers and QA team.

Assistant System Engineer-Trainee (Network Administration)   Jun 2022 – Jul 2022

TATA Consultancy Services Limited, India

- Assisted in network troubleshooting and maintenance to resolve issues and optimize performance.
- Documented network processes, procedures, and workflows to ensure accuracy and clarity.
- Collaborated with team members to maintain and enhance network security protocols.
- Participated in IT infrastructure projects, providing technical support and ensuring project documentation was up to date.

EDUCATION

Advance Diploma in Software Engineering Technology (Fast Track)   May 2024 - Present
Centennial College, Toronto, ON   *Expected graduation Dec 2025*

Bachelor of Computer Science and Engineering   Sept 2019 – May 2022
Charotar University of Science and Technology, India

Diploma in Computer Engineering   Aug 2016 – May 2019
Parul University, India

ACADEMIC PROJECTS

Meal Master
- Focused on streamlining the restaurant food ordering process by providing services such as table registration, food ordering, and seamless payment.
- Utilized advanced Oracle database features, including triggers, procedures, indexes, functions, and cursors for efficient data management.
- Developed the frontend using Angular and Bootstrap to ensure a user-friendly and responsive interface.
- Built the backend with Spring, JPA, and Hibernate, leveraging Oracle Database for robust data storage and management.

Ducting Boxes
- Project aimed towards solving the problem of ducting boxes using a real-time coordinate system based on the map of the site.
- Implemented using various technologies such as Angular, Spring and Hibernate
- Enhanced system accuracy and efficiency by integrating geospatial data processing and automated mapping features.

PARTICIPATION

Tech Expo (Parul University)   Apr 2019
- Secured 1st position in Tech Expo 2019, a project exhibition organizes by Parul university on project titled "Digital Passport".

Future Trend of AR-VR (CHARUSAT University)   Feb 2022
- Gained insights into the application of AR and VR technologies in modern education and healthcare systems.
